

Rainfall

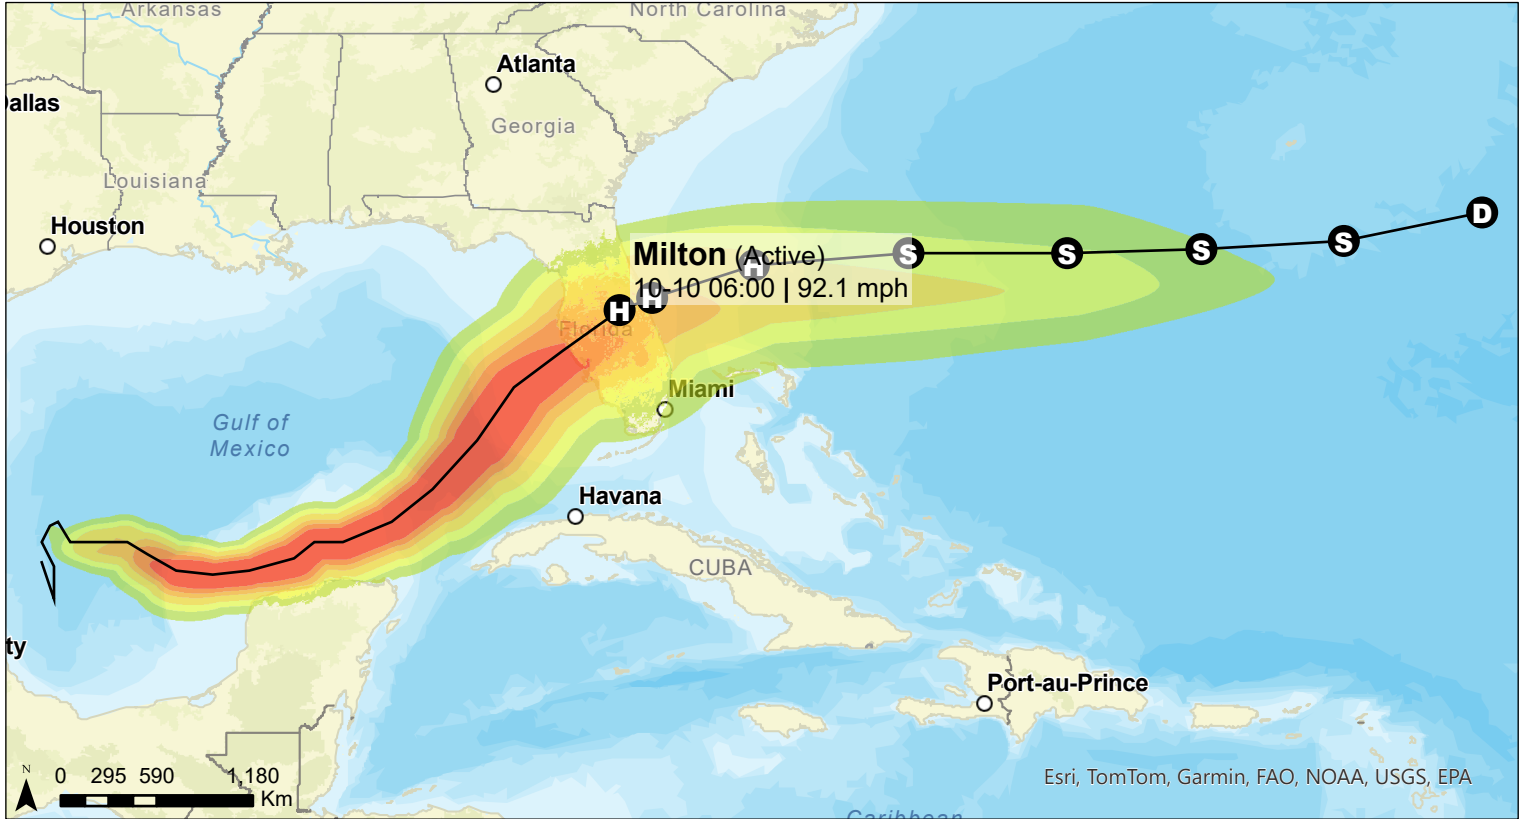

Predicted Rainfall in Inches

The map above shows the maximum predicted rainfall due to Hurricane Milton. The estimated maximum rainfall is **12-24 inches**.

The map below shows the predicted impact of Hurricane Milton. The highest damage level the hurricane could achieve is comparable to: **Catastrophic Damage**.

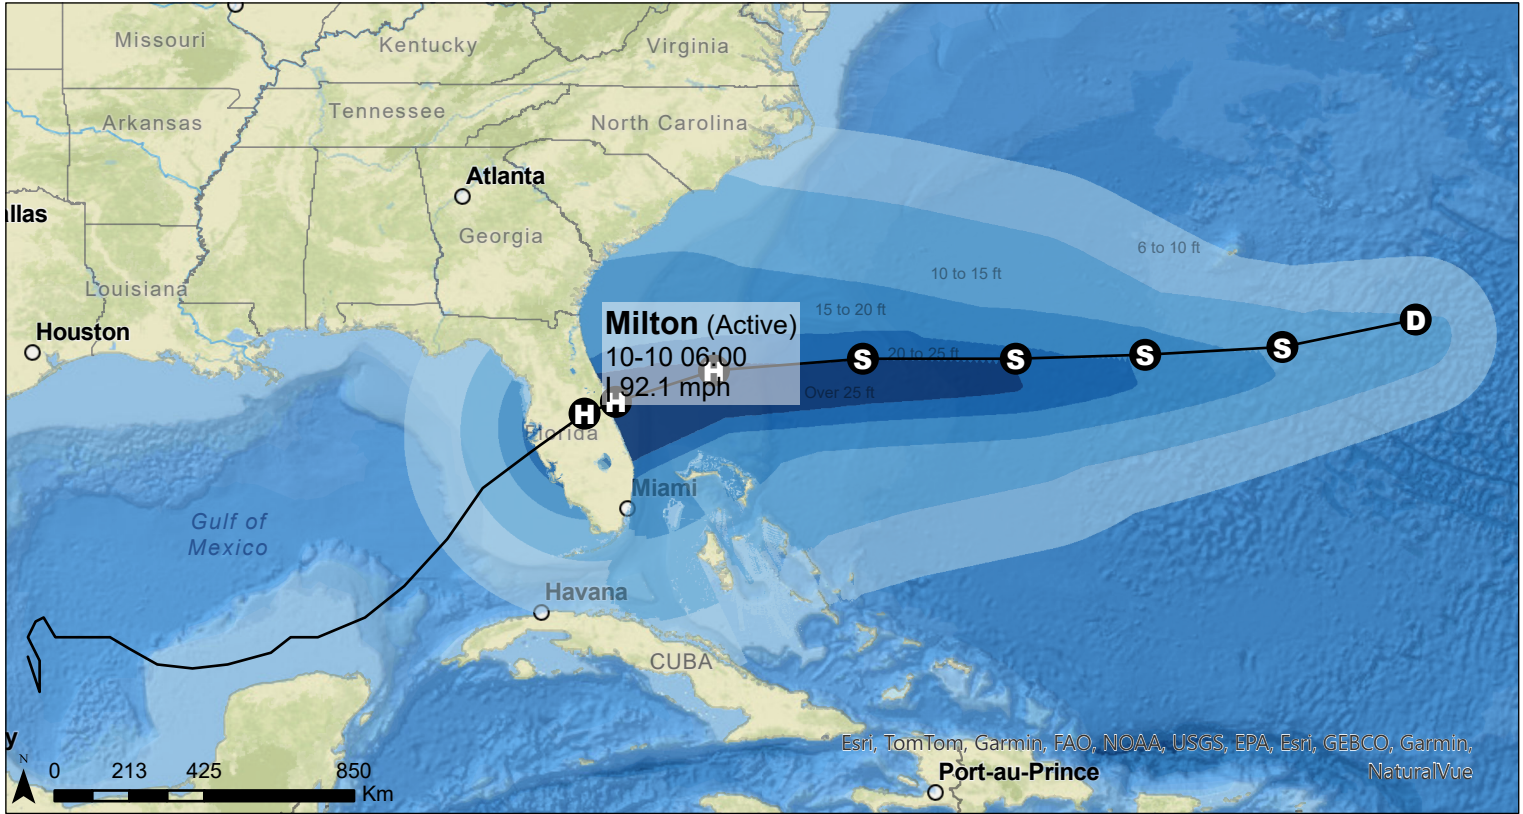

Storm Impact

Predicted Storm Impact

Storm Inundation

Wave/Inundation

The maximum predicted wave/inundation for Hurricane Milton is **over 25 ft.**

Atlantic Ocean

This analysis has been prepared by Willis Towers Watson Northeast, Inc., Willis Towers Watson Midwest, Inc., Willis Limited and/or the "Willis Towers Watson" entity with whom you are dealing ("Willis Towers Watson" is defined as Willis Towers Watson Northeast, Inc., Willis Towers Watson Midwest, Inc., Willis Limited, and each of their respective parent companies, sister companies, subsidiaries, affiliates, Willis Towers Watson PLC, and all member companies thereof) on condition that it shall be treated as strictly confidential and shall not be communicated in whole, in part, or in summary to any third party without written consent from Willis Towers Watson. Willis Towers Watson has relied upon data from public and/or other sources when preparing this analysis. No attempt has been made to verify independently the accuracy of this data. Willis Towers Watson does not represent or otherwise guarantee the accuracy or completeness of such data nor assume responsibility for the result of any error or omission in the data or other materials gathered from any source in the preparation of this analysis. Willis Towers Watson shall have no liability in connection with any results, including, without limitation, those arising from based upon or in connection with errors, omissions, inaccuracies, or inadequacies associated with the data or arising from, based upon or in connection with any methodologies used or applied by Willis Towers Watson in producing this analysis or any results contained herein. Willis Towers Watson expressly disclaims any and all liability arising from, based upon or in connection with this analysis. Willis Towers Watson assumes no duty in contract, tort or otherwise to any party arising from, based upon or in connection with this analysis, and no party should expect Willis Towers Watson to owe it any such duty.

Kinetic Analysis Corporation's (KAC) real-time hazard and impact forecast information is provided "as is" and without warranties as to performance or any other warranties whether expressed or implied. The user is strongly cautioned to recognize that natural hazards modeling and analysis are subject to many uncertainties. These uncertainties include, but are not limited to, the uncertainties inherent in weather and climate, incomplete or inaccurate weather data, changes to the natural and built environment, limited historical records, and limitations in the state of the art of modeling, as well as limits to the scientific understanding of storm weather phenomena. Anyone making use of the hazard and impact information provided by KAC, or the information contained within, assumes all liability deriving from such use, and agrees to "hold harmless" any and all agencies or individuals associated with its creation. The user agrees to provide any subsequent users of this data with this disclaimer. The publication of the material contained herein is not intended as a representation or warranty that this information is suitable for any general or particular use.
